PROFESSIONAL SUMMARY

Content operations professional with hands-on experience managing YouTube publishing workflows, scheduling, quality control, and multi-channel production teams. Skilled at coordinating editors and virtual assistants from script through final QA and publication, while enforcing channel-specific standards for metadata, thumbnails, descriptions, and CTAs. Builds on this with AI-assisted automation experience across n8n, ChatGPT, OpenAI Codex, and Claude Code, turning repetitive operational tasks into reliable, documented workflows.

CORE SKILLS

Content Scheduling & Publishing · YouTube Content Operations · Multi-Channel Content Management · Publishing Calendar Management · Content QA & Quality Control · Titles, Descriptions & Metadata · Thumbnail Coordination · Editorial Workflow Management · Virtual Assistant & Editor Coordination · Team Task Assignment · SOP & Process Documentation · Workflow Optimization · AI-Assisted Operations & Automation · Remote Team Coordination

PROFESSIONAL EXPERIENCE

Operations Manager / Content Workflow Manager — Casgains, Remote

February 2026 – Present

- Coordinate daily content production and publishing workflows across multiple YouTube channels, tracking videos through scripting, editing, thumbnails, QA, and publishing.
- Direct editors, virtual assistants, and contributors to keep content moving through the pipeline; assign tasks by production priority and follow up on delayed or incomplete work.
- Review completed content before publication, enforcing channel-specific standards for thumbnails, descriptions, disclaimers, and CTAs.
- Support recruitment, applicant evaluation, onboarding, and workflow training; help establish and enforce content production standards.
- Identify repetitive operational tasks and lead automation initiatives to simplify workflows.

AI Automation Developer / Product Development — Jennings / JenningsOS, Remote

- Develop and maintain automation workflows using n8n, APIs, and webhooks, connecting CRM, spreadsheets, communication platforms, and databases.
- Build AI-assisted operational tools for monitoring, recommendations, content generation, and business workflows.
- Use OpenAI Codex, Claude Code, ChatGPT, and GitHub Copilot to accelerate development, troubleshooting, and documentation.
- Design structured workflow specifications and implementation plans; test, debug, and validate automations before deployment.

TOOLS & TECHNOLOGIES

Content & Publishing: YouTube Studio, Google Workspace, Google Sheets, Discord

AI & Automation: ChatGPT, OpenAI Codex, Claude, Claude Code, GitHub Copilot, n8n, Make, Zapier

Development & APIs: JavaScript, Python, Node.js, Express, React, REST APIs, Webhooks, SQL, MongoDB

Operations: Task Management, SOPs, QA Checklists, Workflow Documentation, Remote Team Coordination

EDUCATION

Bachelor of Science in Information Technology — Bukidnon State University, 2026
